About Clim-Dev Special Fund

The Clim-Dev Special Fund (CDSF) is a multi-donor fund established by the African Development Bank under a tripartite partnership with the African Union Commission (AUC) and the Economic Commission for Africa (ECA). It is currently capitalized to € 33 million – with contributions from the Nordic Development Fund Swedish International Development Agency and the European Union.

Objectives

CDSF is the investment arm of ClimDev-Africa program which aims to address the challenges associated with climate data and information. It envisages to translate these into effective policies to support adaptation and mitigation on the continent.
